

A Holistic Approach to Water Management

Sustainable Solutions for Improving Water Quality

Monday, December 6, 2010, Cleveland, Ohio

1:00-2:30 PM BAMI-I Meeting

2:30-4:00 PM Southerly Wastewater Treatment Plant Tour

4:00-6:00 PM Town Hall Meeting

Tuesday, December 7, 2010

9:00 AM-5:00 PM *UIM* Conference

This *Water Utility Infrastructure Management (UIM)* Conference for water/wastewater professionals covers all aspects of managing our water resources – from watershed management strategies and urban water restoration to planning, design, construction and maintenance of traditional pipe and plant infrastructure.

There is a growing awareness that achieving the ultimate goal of sustainable drinking water supplies and healthy natural waterways relies on a concerted effort of many different stakeholders, including political and regulatory entities to water, sewer and storm water utilities.

The *UIM* Conference “A Holistic Approach to Water Management” is the only conference of its kind. It features a cross-section of industry stakeholders discussing the components of effective water management and the integration and implementation of water planning initiatives.

Topics to be covered include:

- **History of the Cuyahoga River and Its Impact on Water Quality Planning – Northeast Ohio Regional Sewer District**
- **Planning and Managing a Long-Term Control Plan – Northeast Ohio Regional Sewer District**
- **Energy-Water: Akron’s Anaerobic Digestion System – Akron Public Utilities Bureau**
- **Local and State Government Policy Related to Watershed Management – Cleveland State University**
- **Innovative Infrastructure Financing and Management Strategies for Water/Wastewater – Cleveland State University**
- **Moving Toward Managing Water as a One Resource – Clean Water America Alliance**
- **Planning for a Large-Scale Infrastructure Projects – The Robbins Company**
- **Indianapolis’ Approach to Water/Wastewater Management – City of Indianapolis**
- **Minimally Invasive Construction and Repair Techniques – Hatch Mott MacDonald**

UIM is hosting the conference in conjunction with the Buried Asset Management Institute-International’s (BAMI-I) annual meeting and workshop. The conference is being held at the Northeast Ohio Regional Sewer District’s Environmental and Maintenance Services Center.
